WORK EXPERIENCE

Software Developer Engineer - II

Kotak 811

04/25 - Present

- Integrated **Mountebank** with internal services to mock downstream systems, ensuring reliable and isolated testing even in scenarios involving downstream service unavailability
- Developed individual test cases using **Testcontainers** to enable containerized, reproducible, and environment-independent integration testing

Software Developer Engineer - II

Meesho

07/22 - 04/25

- Optimized and scaled the product aggregation logic to handle **50K RPS** across multiple real estate sections of the app, utilizing caching and performance-enhancing techniques.
- Led the design and migration of business logic, including price calculation and aggregation, from a monolithic service to modular microservices, resulting in a **$20K/month reduction in server costs**.
- Designed and developed a real-time catalog replacement system that factors in reviews and pricing, which spanned multiple services and contributed to a **4% increase in orders** at the platform level.
- **Enhanced Developer Productivity**: Implemented automation workflows for configuration management and API routing, saving significant developer time by eliminating repetitive tasks.
- **Mentored SDE-1s and Interns**: Guided them through onboarding, project work, scope planning, and participated in regular on-call duties.

Software Developer Engineer - Intern

Meesho

01/22 - 07/22

- Contributed to revenue growth by **developing key product features** that significantly scaled our platform, resulting in **10% order count** increase

Summer Analyst Intern

Goldman Sachs

05/21 - 07/21

- Worked on optimising queries of an aggregation flows that **reduced the execution time of a cron by 70%**

EDUCATION

Bachelor of Technology, Information Technology

Indian Institute of Information Technology, Allahabad

2018 - 2022 CGPA - 8.06

CBSE Class XII

2017-2018

Percentage- 92.4%

SKILLS

- Programming Languages: Java, Python, C++
- Backend Development: Spring Boot, REST APIs, Microservices Architecture, Kafka, Reactor-Java, Spring JPA
- Databases: MySQL, MongoDB, ElasticSearch, Redis, HBase, Caffeine
- Cloud Infrastructure: AWS (EC2, S3, Lambda), GCP (Compute Engine, Cloud Functions), CI/CD Pipelines, Jenkins
- Object-Oriented Programming (OOP), Data Structures, Algorithms, Design Patterns, Clean Code Practices

ACHIEVEMENTS

- Star Team of the Quarter (3x):
  - Excellence in non-GST project
  - Revamped Product Description Page
  - Competitive Marketplace Project
- Head, Web Operations, IIITA Info Communication and Incubation Centre (2020-2021)

PROJECTS

Banking Management System

- A Desktop based application which can be used by customers for ATM related transactions
